

ZUBAIR MUWWAKIL

Software Engineer — Backend & Full-Stack

Brooklyn, NY · (347) 584-2617 · zmuwwakil@gmail.com

github.com/zubairmuwwakil · linkedin.com/in/zubairmuwwakil · zubairmuwwakil.com

U.S. & Canadian Citizen · No Sponsorship Required

TECHNICAL SKILLS

Languages: Java, Python, TypeScript/JavaScript, SQL, C#, Swift

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, API Design, Relational Databases

Backend & Data: Spring Boot, Django, PostgreSQL, SQL Server (T-SQL), Prisma, Flyway, REST APIs

Frontend & Mobile: React, Next.js, React Native

Infrastructure & Quality: Docker, Git, GitHub Actions, Linux, CI/CD, JUnit, Testcontainers, Prometheus, OpenTelemetry

EXPERIENCE

G2i Inc. — Software Engineer (Contract) | Remote | Aug 2025 – Present

- Maintain **Python/Django** services across ML, trading, and internal platforms, tracing legacy code to land targeted production changes.
- Deliver REST APIs, background jobs, and **PostgreSQL/SQL Server** schema changes, including indexing, query tuning, and integrity checks.
- Validate changes with unit/integration tests and Dockerized CI, reducing regression risk and supporting repeatable deployments.

Elevation Athletics — Regional Program Coordinator, Tech & Ops | Ontario, Canada | Mar 2023 – Present

Promoted: Coach → Lead Coach → District Lead

- Built and deployed the platform that became **The Pickleball Social**, supporting registration, scheduling, attendance, analytics, and reporting as programs grew from **~50 to 1,000+ participants across 8 cities**.
- Implemented role-based workflows and participant automation, increasing onboarding throughput by **~40%**.

The Senac Group — Software Engineering & Automation | Toronto, ON | Jun 2023 – May 2025

Progressed: Assistant Financial Analyst → Junior Software Engineer → Software Developer, Automation & Analytics

- Built **C#/.NET and SQL Server** automation and reporting pipelines integrating CRM, ERP, HR, and accounting data.
- Automated SQL/Excel VBA workflows, saving **10+ hours/week** and cutting formula defects **~30%**; cost-benefit tooling surfaced **\$25K+ in annual efficiency opportunities**.

SELECTED PROJECTS

MarketLens — Java 21, Spring Boot, PostgreSQL, Docker, OpenTelemetry

github.com/zubairmuwwakil/marketdata

- Engineered idempotent ingestion for up to 250K rows/run using composite-key upserts and yearly-partitioned PostgreSQL storage.
- Secured REST APIs with API-key authentication and Bucket4j quotas; added Prometheus/OpenTelemetry observability, Flyway migrations, and Testcontainers CI.

The Pickleball Social — React Native, Next.js, Prisma, PostgreSQL

apps.apple.com/us/app/the-pickleball-social

- Shipped an iOS/web platform serving ~850 registered accounts, ~100 active users, and 4 clubs, with payments and club operations.
- Implemented a Glicko-2 rating engine and offline-first sync with conflict handling, replay-safe retries, and transactional matches.

orc — Python, Typer, Git, Claude Code

github.com/zubairmuwwakil/agent-orchestrator

- Built a quota-aware coding-agent CLI that isolates tasks on Git branches, invokes Claude Code, and independently verifies changes.
- Implemented verification-driven retries that feed exact test/lint failures into higher-effort attempts while preventing test weakening.

EDUCATION & CERTIFICATIONS

- **University of Toronto** — B.Sc., Double Major in Computer Science & Mathematics | 2020 – 2025
- **Ontario Tech University** — M.Sc., Computer Science | 2025–2026 · Studies deferred after first year
- **Microsoft Certified: Azure Fundamentals (AZ-900)** — Microsoft | 2024
- **Google AI Professional Certificate** - Google | 2026
