

ZUBAIR MUWWAKIL

Software Engineer — Backend & Full-Stack

Brooklyn, NY · (347) 584-2617 · zmuwwakil@gmail.com

github.com/zubairmuwwakil · linkedin.com/in/zubairmuwwakil · zubairmuwwakil.com

U.S. & Canadian Citizen · No Sponsorship Required

TECHNICAL SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, C#

Backend & Data: Django, Spring Boot, PostgreSQL, SQL Server (T-SQL), Prisma, Flyway, REST APIs

Frontend: React, Next.js, React Native

Infrastructure & Quality: Docker, Git, GitHub Actions, CI/CD, Linux, JUnit, Testcontainers, Prometheus, OpenTelemetry

EXPERIENCE

G2i Inc. — Software Engineer (Contract) | Remote | Aug 2025 – Present

- Maintain Python/Django services across ML, trading, and internal platforms, tracing legacy code to land targeted production changes.
- Deliver REST APIs, background jobs, and PostgreSQL/SQL Server schema changes — indexing, query tuning, integrity checks — through PR-reviewed Dockerized CI.
- Gate releases with unit and integration tests plus data-integrity validation, keeping deployments repeatable and regression-free.

Elevation Athletics — Regional Program Coordinator, Tech & Ops | Ontario, Canada | Mar 2023 – Present

Promoted: Coach → Lead Coach → District Lead

- Built and deployed the Pickleball Social platform for registration, scheduling, attendance, analytics, and reporting — scaling programs from ~50 to 1,000+ participants across 8 cities.
- Implemented role-based ops workflows and retention analytics; repeat sign-ups rose from ~20% to ~89% in a tracked cohort (16/18).

The Senac Group — Software Engineering & Automation | Toronto, ON | Jun 2023 – May 2025

Promoted: Intern → Junior Software Engineer → Software Developer, Automation & Analytics

- Built C#/.NET and SQL Server (T-SQL) automation and reporting pipelines integrating CRM, ERP, HR, and accounting data, improving FP&A accuracy and close-cycle reliability.
- Automated recurring SQL and Excel VBA workflows, saving 10+ hours/week and cutting formula defects ~30% with validation guardrails.
- Developed cost-benefit tooling that surfaced \$25K+ in annual efficiency opportunities.

SELECTED PROJECTS

MarketLens — Java 21, Spring Boot, PostgreSQL, Docker, OpenTelemetry

github.com/zubairmuwwakil/marketdata

- Engineered idempotent ingestion of up to 250K rows/run with composite-key upserts and yearly-partitioned PostgreSQL storage.
- Secured REST APIs with API-key authentication, Bucket4j rate limiting, and per-key quota tracking; filter-enforced and unit-tested.
- Instrumented with Prometheus metrics and OpenTelemetry tracing; Flyway migrations and Testcontainers integration tests run in CI.

The Pickleball Social — React Native, Next.js, Prisma, PostgreSQL

apps.apple.com/us/app/the-pickleball-social

- Shipped an iOS/web platform serving ~850 registered accounts, ~100 active users, and 4 clubs, with payments and club operations.
- Implemented a Glicko-2 rating engine with offline-first sync, conflict handling, replay-safe retries, and transactional match processing.

EDUCATION & CERTIFICATIONS

- **University of Toronto** — B.Sc., Double Major in Computer Science & Mathematics | 2020 – 2025
- **Ontario Tech University** — M.Sc., Computer Science | 2025 – 2026 · Studies deferred
- **Microsoft Certified: Azure Fundamentals (AZ-900)** — Microsoft | 2024
